

ROBERT A. MEYER

Columbus, OH

614.551.7757 | rob.a.meyer@outlook.com | github.com/rmeyer1

TECHNOLOGY & ENGINEERING LEADER

Engineering leader with 10+ years of experience building scalable systems, setting automation strategy, and leading high-performing teams across enterprise environments. Currently focused on AI-driven engineering initiatives, including DevEx agents and workflow automation that reduce manual effort, improve delivery visibility, and help teams focus on higher-complexity work. Proven partner to business and technology stakeholders, translating technical strategy and delivery progress into clear executive-level narratives.

Core Competencies:

▪ Engineering Leadership ▪ Product-Minded Delivery ▪ AI-Driven Transformation ▪ DevEx Strategy ▪ Technical Program Leadership ▪ Cross-Functional Stakeholder Management ▪ Executive Communication ▪ Metrics-Driven Delivery ▪ Team Leadership & Mentorship ▪ Platform & Workflow Automation ▪ Roadmap Execution ▪ Enterprise Systems Strategy ▪ Full-Stack Engineering Foundations ▪ CI/CD & Cloud Delivery

PROFESSIONAL EXPERIENCE

COGNIZANT (Feb. 2026 – Present)

Engineering Manager

Manage a 25-person engineering team across 4 business verticals, setting automation strategy and strengthening testing workflows across enterprise delivery teams.

Help lead DevEx team initiatives that design, build, pilot, and deploy team-level AI agents, reducing lower-level manual work and creating capacity for higher-complexity engineering efforts.

Interface with client technology and business stakeholders to report delivery progress through metrics, translating complex technical initiatives and status updates into executive-ready summaries.

Collaborate with senior leadership to shape long-term quality vision, improve engineering processes, and align automation strategy with business objectives.

CARMAX, Richmond, VA (2021 – 2026)

Principal Engineer & Automation Lead (2025 – 2026)

Serve as an internal consultant and technical leader supporting 30+ quality engineers across multiple business verticals. Deliver strategic quality initiatives, define automation best practices, and architect enterprise-level solutions to elevate engineering maturity and accelerate delivery.

- Provide technical direction and mentorship to QE teams, ensuring scalable automation and alignment with organizational quality goals.
- Standardized CarMax automation on Microsoft Playwright for UI and API testing, creating a shared framework template that enabled product teams to quickly adopt, deploy, and maintain automated test suites across engineering and QE organizations.
- Lead strategic initiatives advancing CarMax toward an AI-native engineering environment, including design and prototyping of proprietary AI agents to enhance quality workflows.
- Define quality practices spanning acceptance criteria traceability, defect tracking, UAT with business users, and selection of repeatable, maintainable automated testing candidates.

Lead Quality Engineer – Online Checkout (2022 – 2025)

Led engineering for a high-visibility, revenue-critical full-stack product enabling customers to complete online vehicle purchases. Built a modernized automation ecosystem supporting rapid delivery for an application generating \$20M–\$25M per quarter.

- Built a robust **end-to-end automation framework from scratch** using **Playwright + Node.js**, integrated into Azure CI pipelines.
- Designed a library of **150+ automated user workflows**, enabling full-application regression in **20 minutes**.
- Partnered closely with general managers, associate GMs, and store stakeholders to execute UAT and validate realworld workflows.
- Defined test plans, authored detailed test cases, and managed full defect lifecycle.
- Ensured strong collaboration across product, engineering, and leadership teams to maintain release confidence and minimize production defects.

Senior Quality Engineer – InStore Experience (2021 – 2022)

Developed automated testing solutions for custom instore tools used by CarMax sales associates.

- Built and maintained automation frameworks using **WebDriverIO + Mocha**, spanning microservices, APIs, and custom UI applications.
- Supported major initiatives, including the rollout of the **Appraisal CheckIn** system that reduced customer wait times by **~45 minutes** and improved Salesforce data accuracy.
- Partnered with engineering teams to validate data integrity, workflow consistency, and system scalability.

Additional Highlight:

- Winner, CarMax Hackathon (2023) – Led the team that developed “Be My Co-Buyer,” a feature enabling digital form sharing for co-buyers, streamlining credit and purchase workflows. Presented the solution to multiple VPs and the CIO.

VANTAGE POINT LOGISTICS, Columbus, OH (2019 – 2021)

Lead Software Automation Engineer

- Designed and implemented UI automation frameworks for SaaS platforms using **Selenium/WebDriver + Python**.
- Established Azure CI pipelines for automated regression execution across multiple test environments.
- Maintained framework enhancements, implemented new regression suites, and resolved defects.
- Built a Postmanbased API automation solution leveraging dynamic scripting in Node.js.

PERFICIENT, Columbus, OH (2019)

Software Developer

- Enhanced backend performance by rewriting a Python service into a high-performance Node.js implementation.
- Developed API-driven services interacting with PostgreSQL.
- Maintained UI automation using Google Puppeteer and contributed across MERNstack applications.

HMB INC., Columbus, OH (2016 – 2019)**Consultant, Software Developer / Test Engineer**

- Built a Pythonbased automation framework using Behave and Splinter.
- Performed crossbrowser automation, CI testing via Jenkins, and authored regression test scripts.
- Executed UAT cycles, managed defects, and collaborated closely with business stakeholders.

DHL SUPPLY CHAIN, Columbus, OH (2014 – 2016)**Implementation Analyst I & II**

- Created requirements documentation, IT project plans, and QA/UAT test plans for largescale WMS implementations.
- Led EDI integration, UAT cycles, and enduser training for RedPrairie WMS.
- Developed SQL reports and provided realtime operational support during golive.

EDUCATION

Ohio University, Athens, OH

Bachelor of Business Administration, Management Information Systems

May 2014

Alpha Kappa Psi – Professional Business Fraternity
